Procurement & Supply Chain Leader | Energy · Oil&Gas · Utilities ·
Telecom | \$500M Spend Analytics · \$100M+ Portfolios · AI-Enabled
Sourcing | Open to Global Roles
Greater Delhi Area

Summary

15+ years of procurement leadership across Oil & Gas, Utilities, and Telecom. \$200M+ portfolios. Energy companies lose millions in contractor spend not because of bad people — but because nobody's looked closely enough. That's the work I do — across category strategy, AI-enabled sourcing, and contract structures built to hold up under scrutiny. My work spans the full spectrum: • At Wood Mackenzie, I led Supply chain consulting engagements for North American utilities and upstream E&P operators • At BT Group I owned category strategy for a £200M+ engineering services portfolio across the UK and Europe. • At Accenture, I ran source-to-contract for \$100M+ in capital projects for an upstream E&P operator — EPC contracts, well hookups, surface facilities. • Earlier in my career, managed Procurement & Supply Chain for ONGC and OIL India jack-up offshore and onshore operations, where a late delivery doesn't cost you a meeting — it costs you a rig day What I bring to a senior role: Sector depth across Oil & Gas, Utilities, Power, Telecom, and Consulting. Hands-on experience with AI and analytics tools in live procurement environments. Global sourcing across the US, Middle East, Europe, Singapore, and India. The ability to operate at board level on strategy and get into the detail when the contract needs it. Open to: Senior procurement leadership roles and senior consulting positions globally, Independent Consultant — energy, utility, industrial, and telecom sectors. Available immediately. Let's connect if you're building a high-performing procurement function or tackling supply chain challenges in the energy transition.

Experience

Wood Mackenzie
Principal Consultant -Supply Chain Consulting (Energy)
February 2025 - May 2026 (1 year 4 months)

Gurugram

Project-based consulting engagement across upstream E&P and North American utility clients covering capital project benchmarking, category intelligence, contractor spend analytics, supplier performance, and organisational benchmarking.

- Benchmarked a leading global E&P operator's multibillion upstream gas monetization project in West Africa — dual-level cost analysis across D&C, facilities, and pipeline identified above-median rig rates and Q3/Q4 cost outliers, informing the client's pre-FEED budget revision and capital reallocation.
- Led an independent contractor spend assessment — applied rate variance decomposition and commercial impact quantification to identify ~\$10M in cost optimization opportunities for the client's next RFP and negotiation cycle; designed a contracting and governance strategy.
- Benchmarked supply chain organisational sizing across 6 North American peer utilities using spend-per-FTE and spend-per-RFP quartile methodology — identified client above Q3 on key structural metrics; category segmentation and operating model recommendations adopted by client leadership as directional strategy.
- Delivered multicategory intelligence report for a major North American utility (Transmission Structures, Transmission Conductor). Findings gave client a clear negotiation mandate & recommended competitive bid strategy.
- Built an Excel-Alteryx workflow tracking supplier KPIs across WAML, Savings, Cycle Time, and MPSC metrics for a major utility's Energy Waste Reduction programme.
- Conducted a recurring market intelligence briefing program for multiple North American utility clients — translated commodity pricing, tariff policy impacts, and supply chain risk signals into procurement transformation recommendations.

BT Group

Global Category Manager- Procurement Professional

March 2023 - February 2025 (2 years)

Gurugram

- Owned and led the civil infrastructure services category (£100M+) within a £200M+ engineering services portfolio -- negotiated £2M+ in cost savings on service delivery contract renewals by benchmarking incumbent pricing using AI-enabled spend analytics and anchoring commercial negotiations on data-driven findings.

- Managed end-to-end category strategy across civil infrastructure and service delivery — led techno-commercial evaluations and supplier negotiations delivering measurable commercial improvements; mentored junior buyers across RFP development and bid evaluation work.
- Drove digital procurement transformation across engineering categories — applied Lean process improvement principles to standardise contract governance and S2P workflows across a £200M+ portfolio; improved spend visibility and supplier accountability across Finance, Engineering, and Operations stakeholder groups.

Contract Negotiation | Digital Tools | Category Strategy | Supplier Relationship Management | Data Analytics | Stakeholder Engagement | Cost Optimization | Global Sourcing

Accenture

Sourcing and Cat Enablement Team Lead -PSCM

October 2021 - March 2023 (1 year 6 months)

Gurugram

- Generated ~10% cost savings across a \$100M+ CapEx procurement portfolio — managed EPC contracts, well hookups, surface facilities, and engineering manpower from EOI through commercial award; led a cross-functional team of 5 across Engineering, Finance, and Commercial work streams.
- Executed end-to-end sourcing in SAP Ariba — designed price evaluation matrices incorporating total cost of ownership analysis, ran competitive bid evaluations, and issued award recommendations aligned to cost, quality, and schedule targets; improved CapEx procurement cycle time and delivery compliance.
- Won the Cairn Oil and Gas Business Partner Employee Award FY2022 to 23 — cited for rapid turnaround on a high-value project contract renewal meeting aggressive commercial and schedule targets while maintaining full stakeholder alignment across business units.
- Applied data analytics to CapEx procurement decisions, improving cost efficiency and delivery performance across the project portfolio.

JINDAL DRILLING & INDUSTRIES LTD.

Procurement Manager - Offshore Drilling projects

September 2017 - July 2021 (3 years 11 months)

Gurgaon, Haryana, India

- Achieved zero rig downtime across active ONGC and OIL India jack-up drilling operations by managing end-to-end procurement for critical offshore equipment and MWD contracts, resulting in uninterrupted rig productivity across multi-year programmes.
- Maintained cost discipline across multi-year CapEx and OpEx programmes by developing and managing project-specific budgets aligned with tender conditions and rig operational requirements, resulting in consistent spend performance against plan.
- Reduced single-source dependency and improved supply resilience by building and optimising a strategic vendor base across 6 global markets — US, Middle East, Canada, Singapore, China, and India — resulting in reliable, cost-effective supply for critical drilling components.
- Improved procurement efficiency and audit-readiness by mapping procurement requirements into ERP systems and designing documented solutions, resulting in streamlined processes across complex offshore project environments.

Quippo Oil and Gas Infrastructure Limited

Assistant Manager (SCM) - Onshore Drilling Project

May 2013 - August 2017 (4 years 4 months)

Gurgaon, Haryana, India

- Supervised procurement and supply chain management for onshore drilling rigs (1,000–2,000 HP) serving Cairn Oil & Gas and ONGC — maintaining zero rig downtime through reliable material delivery.
- Negotiated rate contracts and streamlined logistics processes, reducing procurement and freight costs; awarded Distinguished Contributor Award 2015–16.
- Built and managed a centralised supplier interface model, ensuring timely material availability and strengthening long-term vendor relationships across national oil company projects.
- Sourced equipment globally across the US, Middle East, Canada, Singapore, and China — expanding the qualified vendor base and reducing single-source dependency.

Shyama Power India Ltd

Assistant Manager (PSCM) - EPC projects
September 2009 - May 2013 (3 years 9 months)
Gurgaon, Haryana, India

- ◆ Handled project procurement for Power Grid turnkey EPC contracts (Rural Electrification under the "RGGVY" programme)
- ◆ Improved business performance through meeting requirements and resolving issues with cost variances and the price estimation process
- ◆ Drafted BOQ and bar chart in accordance with tender specifications and obtained client approval for GTP, drawing, and type test
- ◆ Identified potential vendors and suppliers in order to achieve cost-effectiveness
- ◆ Raised inspection calls and works with the client to ensure timely inspections
- ◆ Inspection and lead time liaison with Power Grid vendors and Nodal Officers

Education

University of Petroleum and Energy Studies
MBA, Power Management · (August 2007 - May 2009)

Kumaun University Nainital
BSc, Physics, Chemistry, Maths · (July 2003 - June 2006)
